Report of Funded Projects

Funding Information Past/Completed

2013-2015	Sexual Dysfunction in Women with Gynecologic Cancer Patty Brisben Foundation PI (\$64,400) The multi-institutional study investigated the impact the gynecologic cancers had on sexual function in women.
2014-2017	Gynecologic Oncology Group (GOG)/NRG Oncology Group University of Colorado School of Medicine Site Site Principal Investigator The NRG Oncology group consortium is the co-operative group for gender-specific cancers including breast, prostate, and gynecologic malignancies and represents breast, radiation and gynecologic oncology

Current

2014-	The Safety of Oral Apixaban (Eliquis) versus subcutaneous Enoxaparin (Lovenox) for the prevention of venous thromboembolism (VTE) in women with pelvic malignancy: A Prospective, Randomized Open Blinded-End Point Study (PROBE) design Bristol Myers Squibb National Principal Investigator (\$601,000)(5% salary support) This is a multi-institutional grant that examines the efficacy/safety of oral anti-coagulation versus subcutaneous anticoagulation for the prevention of DVT/PE in women with gynecologic malignancy
2016-	A randomized controlled, multi-institutional trial of ultrasonic aspiration versus CO2 laser ablation for the treatment of pre-malignant disease of the vulva Stryker Pharmaceuticals National Principal Investigator (\$305,131) (5% salary support)

This multi-institutional interventional study randomizes patients to either laser ablation or ultrasonic aspiration to treat VIN3. Primary endpoints of this study are recurrence of VIN3 at 6 and 12 months and quality of life after treatment.

- 2017- CANscript™ Clinical Outcomes in a Real-World Setting (ANCERS)-2: A prospective multi-institutional observational study examining the clinical utility of CANscript in routine clinical practice
MitraBiotech
National Principal investigator (\$880,000) (10% salary support)

This is a multi-institutional trial validating the use of CANscript technologies in the prediction of efficacy of chemotherapy doublets in the treatment of colon, ovarian, and oropharyngeal cancers.

- 2017- A phase II randomized study of rucaparib maintenance therapy versus placebo in metastatic and recurrent endometrial cancer
Clovis Oncology
National Co-Principal Investigator (\$1,320,000) (2% salary support)

This is a multi-institutional trial randomizing patients with recurrent endometrial cancer to PARP-inhibitor therapy with rucaparib versus placebo to assess for benefits in progression free and overall survival

Submitted

- 2019- Combining an HMG-CoA Reductase Inhibitor With Chemotherapy To Treat Ovarian, Fallopian Tube, Or Peritoneal High Grade Serous Carcinoma: A Translational Science Investigation
US Department of Defense-Ovarian Cancer Research Program
National Principal Investigator (\$908,000) (5% Salary support)
Co-Investigator: Ben Bitler, PhD-University of Colorado
Status: Invited for second round submission

Current Unfunded Projects

- 2016- Reducing Urinary Tract Infection Rates using a Controlled Aseptic Protocol for Catheter Insertion (Mentor PI)
This is a randomized, quality improvement program evaluating urinary tract infection (UTI) complications and quality of life following gynecologic or benign surgery up to two weeks post-op.
